Is an Independent Aviation/Airs pace Cons	sultancy involved in this proposal?			
4. Summary of Intended Change				
Please use the check boxes below to indicate	e the nature of the intended change(s): *			
Flight Information Region (ENR 2.1)	Upper Information Region (ENR 2.1)	Terminal Control Area (ENR 2.1)		
Other Regulated Airs pace (ENR 2.2)	Lower ATS Routes (ENR 3.1)	Upper ATS Routes (ENR 3.2)		
Area Navigation Routes (ENR 3.3)	Helicopter Routes (ENR 3.4)	Other Routes (ENR 3.5)		
En-Route Holding (ENR 3.6)	Name-Code Designators (ENR 4.4)	Prohibited/Restricted/Danger Areas (ENR5.1)		
Military Exercise/ ▼ Training Areas (ENR 5.2)	Other Danger/ Hazard (ENR 5.3)	Aerial/Sporting/Recreational Activities (ENR 5.5)		
Bird Migration/Sensitive Fauna (ENR 5.6)	ATS Airs pace (AD-EGXX-2.17)	Flight Procedures (AD-EGXX-2.22)		
ATCSMAC (AD-EGXX-5)	Standard Instrument Departure (AD-EGXX-6)	Standard Arrival Route (AD-EGXX-7)		
Instrument Approach Procedure (AD-EGXX-8)	Visual Reference Point .	Release of Controlled Airspace .		
Please use the check box below to indicate w	whether this is an administrative change:			
	strative change to the Aeronautical Informati	on Publication (AIP)?		
5. Statement of Need				
Please provide a brief 'Statement of Need' ex Statement of Need should dearly articulate be addressed along with any other factors or	the current situation, the issue (and the car	pportunity you are seeking to address. Your use of it) to be resolved or the opportunity to		
Current situation Traffic from the Irish FIR boundary into UK airspace essentially uses two main high-level flows, one from central/northern Eire across the Irish Sea over the north Welsh coast towards the Manchester area, and the other from southern Eire across southern Wales towards the London area.				
Issue or opportunity to be addressed, and the cause The proportions of eastbound flights using the southern flow increased after the Irish FIR implemented Free Route Airspace in 2010. This proportion-change means some Heathrow arrivals need to be "stack swapped" from the OCK hold to the BNN hold more often and at short notice, causing tactical complexity for NATS Swanwick LAC S23 & LTMA controllers. There is an opportunity to add an additional flow in the "gap" between the two main flows, linking central/northern Eire diagonally NW/SE across Wales towards the London area (for some LTMA arrivals and also for UK overflights).				
Additional flightplanning options for airline of	he main flows, reducing complexity for S23 & operators, whether landing in the UK or oversown in UK airs pace with consequential fuel/e
