

Dear << Test Last Name >>,

I'm writing to update you on an important piece of work that is about to begin at East Midlands Airport as part of the Government's national programme to modernise the way UK airspace is managed.

All airports in the UK have been asked to review their current controlled airspace up to 7,000 feet and decide whether the routes currently flown by aircraft are the best they can be.

The aim of the programme is to increase safety and efficiency of operations, whilst also seeking to reduce carbon emissions and the impact of noise.

The first stage of this process is to work with stakeholders to determine a set of design principles – or rules – that we will use to govern the review of our airspace.

I'm writing to you as a key stakeholder for the airport to ask you to share your views. You can find out more about East Midlands Airport's Future Airspace Programme by visiting our dedicated web-page at eastmidlandsairport.com/community/future-airspace.

We have also published a useful information booklet, which explains more about the programme, what we are trying to achieve, and the key areas where we would like your input. You can [view the information booklet by clicking here](#).

On the website and in the information booklet you will also find a link to [complete an online feedback form](#). Here you can tell us what is important to you so we can make sure it is considered in our thinking. All of this feedback will be used by our technical teams when they start planning future routes later in the programme.

This is the biggest change to the UK's airspace in over 50 years and I hope that you will be able to find the time to play your part in shaping it.

Many thanks and best wishes,

East Midlands Airport

You've received this email as a stakeholder who may be impacted by changes to the airport's airspace.

You can [unsubscribe](#) from receiving any further emails about this programme at any time.

Good Afternoon,

We emailed you recently about an important piece of work being carried out at East Midlands Airport, which aims to modernise the way our airspace is managed.

The aim of the programme is to increase safety and efficiency of operations, whilst also seeking to reduce carbon emissions and the impact of noise.

We want to ensure that the community surrounding East Midlands Airport have the opportunity to shape the future of our airspace, so we are reaching out to you, to ask for your thoughts and opinions via our [online feedback portal](#).

[Have Your Say!](#)

We appreciate you might not currently be impacted by the operations of the airport, but we still encourage you to take up this opportunity to have your say.

This is the biggest change to the UK's airspace in over 50 years and I hope that you will be able to find the time to play a part in shaping it.

Kind Regards

East Midlands Airport

The Online Portal is Closing Soon!

Good Afternoon,

I emailed you recently about an important piece of work which is being carried out at East Midlands Airport, which aims to modernise the way the airspace around the airport is managed.

We do not want you to miss the opportunity to influence the design principles which will be used to redesign the airspace in the future. Therefore, I ask if you have not done so already, please share your thoughts and opinions through our [online feedback portal](#) as soon as possible.

[Have Your Say Now](#)

Our portal is closing on Monday 7th October, so it's essential you submit your opinions before then.

This airspace redesign is taking place as part of a wider Government initiative; to modernise airspace across the whole of the UK, making it safer, more efficient and more sustainable.

We appreciate you might not be affected by the operation of the airport now, but we still encourage you to take this opportunity to have your say.

Many thanks and best wishes,

East Midlands Airport
