

CAA Response - following stage 1-3 multi-gateway on 30 Oct 20 for ACP2020-66 Removal of EGSS LYD SIDs

*This ACP has not passed the Stage 2 Gateway. An issue was brought to the attention of the CAA, following the gateway on 30 Oct 20, that required us to reconsider the information presented and which may influence the scaling of this ACP. In order to ensure that the CAA is able to confirm the appropriate scaling level (which forms part of the Stage 2 Gateway) we require the Sponsor to assure us that the impacts of the preferred option, if approved, would not lead us to subsequently conclude that the change(s) should have been categorised as a Level 1 ACP under CAP 1616 (p25).*
