Please use the check box below to indicate whether this is an administrative change:

- Does your proposal represent an administrative change to the Aeronautical Information Publication (AIP)?

5. Statement of Need

Please provide a brief 'Statement of Need' expressing explicitly what airspace issue or opportunity you are seeking to address. Your Statement of Need should clearly articulate the current situation, the issue (and the cause of it) to be resolved or the opportunity to be addressed along with any other factors or requirements. *

The request for a RMZ comes after several serious air misses, involving winch launching. In one instance the launch had to be abandoned to avoid a collision. Plus a fatal mid air collision in December 2016. It has come to our attention that the chart symbol with intensive Gliding / Cables 3.6 is being ignored with regular over flights of the airfield well below the stated height.

We already hold an airfield radio frequency 127.575mhz. Our tugs, motorglider & 90% gliders are Flarm equipped.

We are a very busy airfield & the second largest gliding club in the UK with a Police helicopter operation & a Rotax Engine business (mainly microlights) operating on the South side of the airfield. Spin training & aerobatics take place from 4000ft AGL. We regularly host gliding competitions, where up to 60 gliders are launched in a hour. In 2018 we will be hosting a Nationals, a Regionals & the National Glider Aerobatic Competitions'. We are bidding to host the Womens Worlds in 2021.

Using the radio heightens situational awareness. By having a RMZ would heighten this further for all parties. Also now that moving maps are becoming the norm. The RMZ will show up, giving the pilot ample time to avoid or make a radio call with his intentions.

A sensible RMZ would be 10km / 6nm Radius centred on the airfield with an altitude of 4600ft. As we don't fly at night, it would be daylight hours only starting at 0800z till sunset.

Please specify the altitudes (where applicable) affected by your Statement of Need:

- Surface to below 4,000 feet
- 4,000 feet to below 7,000 feet
- 7,000 feet to below 20,000 feet
- 20,000 feet and above

6. Proposed Dates

Please provide your proposed date for the submission of your change proposal to the CAA. This should be the date on which you are expecting to submit your formal airspace change proposal to the CAA. Please note that your formal airspace change proposal must be submitted alongside all of the supporting documentation required by the CAA to complete our regulatory assessment of the Proposal; consequently the date on which you place in this field should represent the point at which you will have the formal airspace change proposal **and all** of the supporting documentation ready to submit to the CAA. This date is required to assist us with the allocation of the required CAA-resource to your proposal and therefore it is a key date in our planning process. Whilst we will try to accommodate your specified timescales, there may be occasions where it is not possible for us to do so given the large number of projects that are already 'in process' You should also note that any changes to the above date may impact our ability to process your airspace change proposal within your preferred timescales. It should also be noted that from September 2018 any amendments submitted by a Data Originator or ANSP for onward promulgation in the UK IAIP will be subject to the Aeronautical Data Quality Requirements. See [Commission Regulation \(EU\) No 73/2010](#) (updated by 1029/2014) and [CAP 1054: Aeronautical Information Management](#) guidance material for further information. These requirements will be discussed in greater detail during the course of your initial meeting with the CAA.
