

20210108-FUTURE COMBAT AIRSPACE ACP-2020-026 STAGE 1B ENGAGEMENT-O

You forwarded this message on 08/01/2021 15:53.

Sir, Ma'am, all,

The MoD has identified a requirement for the generation of new, suitable and safe airspace in the UK for modern military aircraft and systems to train to their full capabilities. Under CAP1616, an airspace change process (ACP) – ACP-2020-026 – has been submitted. As part of this process, the MoD seek your views on the principles of the airspace change. This will allow us to understand and consider how our proposal may affect your operation and minimise any impacts where possible.

Please can you ensure the attached letter is disseminated to all relevant personnel in your departments / areas of responsibility to ensure as broader audience as possible. Annex A to the letter provides you an opportunity to provide feedback on the proposed design principles and we welcome your input to the process, even at this early stage.

In order to meet the submission deadline to the Civil Aviation Authority (CAA) for the FCA change proposal, we request submission of your feedback via the email Air-AirspaceTrial@mod.gov.uk by NLT 12 Feb 2021.

If you require any clarification on the points discussed within the document please contact us via email and we will respond as soon as we are able.

Kind regards,

A-S Wpns SO2 | 92 Squadron | HQ Air & Space Warfare Centre | RAF Waddington | Lincs | LN5 9WA | Office: 95771 726240 | SSS: 9298 5771 2923 | Air-AirspaceTrial@mod.gov.uk
