Please use the check box below to indicate whether this is an administrative change:

- ☐ Does your proposal represent an administrative change to the Aeronautical Information Publication (AIP)?

5. Statement of Need

Please provide a brief 'Statement of Need' expressing explicitly what airspace issue or opportunity you are seeking to address. Your Statement of Need should clearly articulate the current situation, the issue (and the cause of it) to be resolved or the opportunity to be addressed along with any other factors or requirements. *

The United Kingdom (UK) Ministry Of Defence (MOD) operates three Royal Navy (RNAS) bases being Culdrose, Plymouth Military and Yeovilton. As part of the project Marshall, the surveillance sensors on the following sites are to be replaced

- Culdrose Primary Surveillance Radar (PSR) and Secondary Surveillance Radar (SSR)
- Wembury Co-mounted PSR/SSR (replaced by a standalone PSR on the existing site and a standalone SSR on a new site)
- Hartland Co-mounted PSR/SSR (PSR to be removed, only the SSR will be replaced, potential feeds from Burrington and Pease Pottage NATS radars to compensate for PSR removal)
- Portland Co-mounted (replaced by a standalone PSR on the existing site and a standalone SSR on a new site)
- Yeovilton PSR and SSR

Due to the Wembury and Portland PSR being taken off line, it is now recognised that Plymouth Military need to retain the ability to keep an accurate air-picture, this is especially relevant at particular times of the week due to the operational/training requirements of the Royal Navy. This is to ensure safety of Plymouth Military Controllers, Aircraft operating in the Danger Areas and the General Aviation (GA) community who may be transiting through or in close proximity to that airspace.

This only affects the PSR of each radar meaning SSR will be available throughout the period of work.

The Airspace Change Proposal (ACP) will not be a permanent feature but will be active for the duration of the transition period when no PSR coverage is available.

Please specify the altitudes (where applicable) affected by your Statement of Need:

- ☒ Surface to below 4,000 feet
- ☒ 4,000 feet to below 7,000 feet
- ☒ 7,000 feet to below 20,000 feet
- ☐ 20,000 feet and above

6. Proposed Dates

Please provide your proposed date for the submission of your change proposal to the CAA. This should be the date on which you are expecting to submit your formal airspace change proposal to the CAA. Please note that your formal airspace change proposal must be submitted alongside all of the supporting documentation required by the CAA to complete our regulatory assessment of the Proposal; consequently the date on which you place in this field should represent the point at which you will have the formal airspace change proposal **and all** of the supporting documentation ready to submit to the CAA. This date is required to assist us with the allocation of the required CAA-resource to your proposal and therefore it is a key date in our planning process. Whilst we will try to accommodate your specified timescales, there may be occasions where it is not possible for us to do so given the large number of projects that are already 'in process'. You should also note that any changes to the above date may impact our ability to process your airspace change proposal within your preferred timescales. It should also be noted that from September 2018 any amendments submitted by a Data Originator or ANSP for onward promulgation in the UK IAIP will be subject to the Aeronautical Data Quality Requirements. See [Commission Regulation \(EU\) No 73/2010](#) (updated by 1029/2014) and [CAP 1054: Aeronautical Information Management](#) guidance material for further information. These requirements will be discussed in greater detail during the course of your initial meeting with the CAA.
