

Good Afternoon All

We have reviewed the ACP 2018-77: Flag Officer Sea Training (FOST) South Coast Danger Area Enhancements for Implementation and have considered this against v2 of the SoN. Noting the timeline of the AIRAC against the requirement to align with LOA and build times I have looked to make this decision as soon as practicable noting the delay would have led to a September submission rather than an April submission. We have assessed the submission forwarded both in Word and PDF, from the document submitted I would note some inconsistencies on the submission:

- D037 and D039 within the current timings were displayed incorrectly compared to the timings published in the AIP
- D036 represented no change to what was published in the AIP

Noting the above and in consultation my understanding is that D037 and D039 timings are to align with that of D036 and D038. I have therefore amended the timings in the table below, highlighted in red. I have also removed D036 from the table. The table below therefore reflects the actual changes we have assessed, where yellow elements indicate where data has changed, noting elements that have been removed are not highlighted.

I would note

- An LOA has been agreed by both NATS and FOST and is awaiting signature
- Confirmation that JFADT, (the Sponsors) and the RN (the DA authority) through FOST were content with this change
- The AMC is content with the changes below
- The Levels of D036, D037, D038, D039 and D040 are still under review which is why the nomenclature change applied to the remaining areas was not applied to these areas also and that post review a new ACP will be submitted to address this
- The AMC have contacted the Network manager and they are aware and content with the change
- An AIC has been prepared to accompany this change, The AIP AIRAC submission date is Friday 16 April 2021 for a publication on the Thursday 15 July 2021, the AIC submission date is Friday 23 April 2021 for a Thursday 3 June 2021 which would provide 4 weeks notice of the change
- All changes reflect reductions in timings, reduction in levels or nomenclature change to move maximum levels from column 3 to column 2
- The Online Portal has not been updated with V1 or V2 of the SoN. Noting the timeline and the change of personnel I can understand if the files are no longer readily available, I have therefore attached the V1 V2 and the original assessment meeting minutes. Could you please ensure they are redacted appropriately and uploaded to the portal in stage 1a
- We would normally expect the portal to be up to date prior to making a decision however noting the timeline and potential benefit of this change, I am content to make the decision now on the understanding the associated documents will be uploaded as soon as practicable

Considering all of the above the changes listed below have been approved as a Level 0 Change. We are content for the Sponsor to now submit these changes via Aurora using the email as evidence of approval. Over the next week we will review the AIC to submit that and send that back to yourselves for submission early next week to meet the 23 April 2021 deadline.
