Good morning Sirs, Ma'ams, All,

The MoD has identified a requirement for a suitable and safe airspace in the UK to facilitate Exercise Joint Warrior, allowing for modern military air systems to train to their full capabilities in a joint operating environment. Under CAP1616, an airspace change process (ACP), [ACP-2020-092](#) has been submitted. As part of this process, the MoD seeks your views on the principals of the airspace change. This will allow us to understand and consider how our proposal may affect your operation and minimise any impacts where possible.

Please can you ensure the attached letter is disseminated to all relevant personnel in your departments / areas of responsibility to ensure as broad audience as possible. **Annex A to the letter provides you with a framework to provide feedback on the proposed design principles and we welcome your input in the process. Please inform us if this ACP does not affect your operations and you do not wish to be engaged any further.**

In order to meet the submission deadline to the Civil Aviation Authority (CAA) for the airspace change proposal, we request submission of your feedback to this email address, Air-FastJetAreasProposal@mod.gov.uk by NLT Friday 17 September 2021. If you require any clarification on the points discussed within the document attached, please contact us via email and we will response as soon as we're able to.

Kind regards,
