

London Luton Airport Operations Ltd
FASI-S ACP-2018-70
Initial Options Appraisal Technical Appendix

Introduction

This technical appendix includes quantitative analysis and assessment of the airspace change options presented in Luton Airport's Stage 2B Initial Options Appraisal submission document.

Further information around the development of the airspace change options, our methodology for appraisal, and the qualitative assessments undertaken for each option, are included in our Stage 2A and Stage 2B documents published on the [CAA Airspace Change Portal](#).

Please note that all options are subject to change and refinement as we progress through the airspace change process.

This document is split into six sections. Please click on the links below to navigate to a section within the document:

[Fuel Burn Calculations](#)

Introduction

This technical appendix contains overflight contours and data tables associated with these contours.

The overflight contours have been calculated using the CAA's definition of overflight as defined in CAP1498. They assume a cone elevation angle of 48.5°. The population counts are based on CACI data. The modelling takes into account the average modal split at Luton Airport.

Our IOA uses CACI population forecast data. This data is supplied to one decimal place and for this IOA we have not rounded the data. As part of our FOA at Stage 3 the data will be rounded to the nearest person.

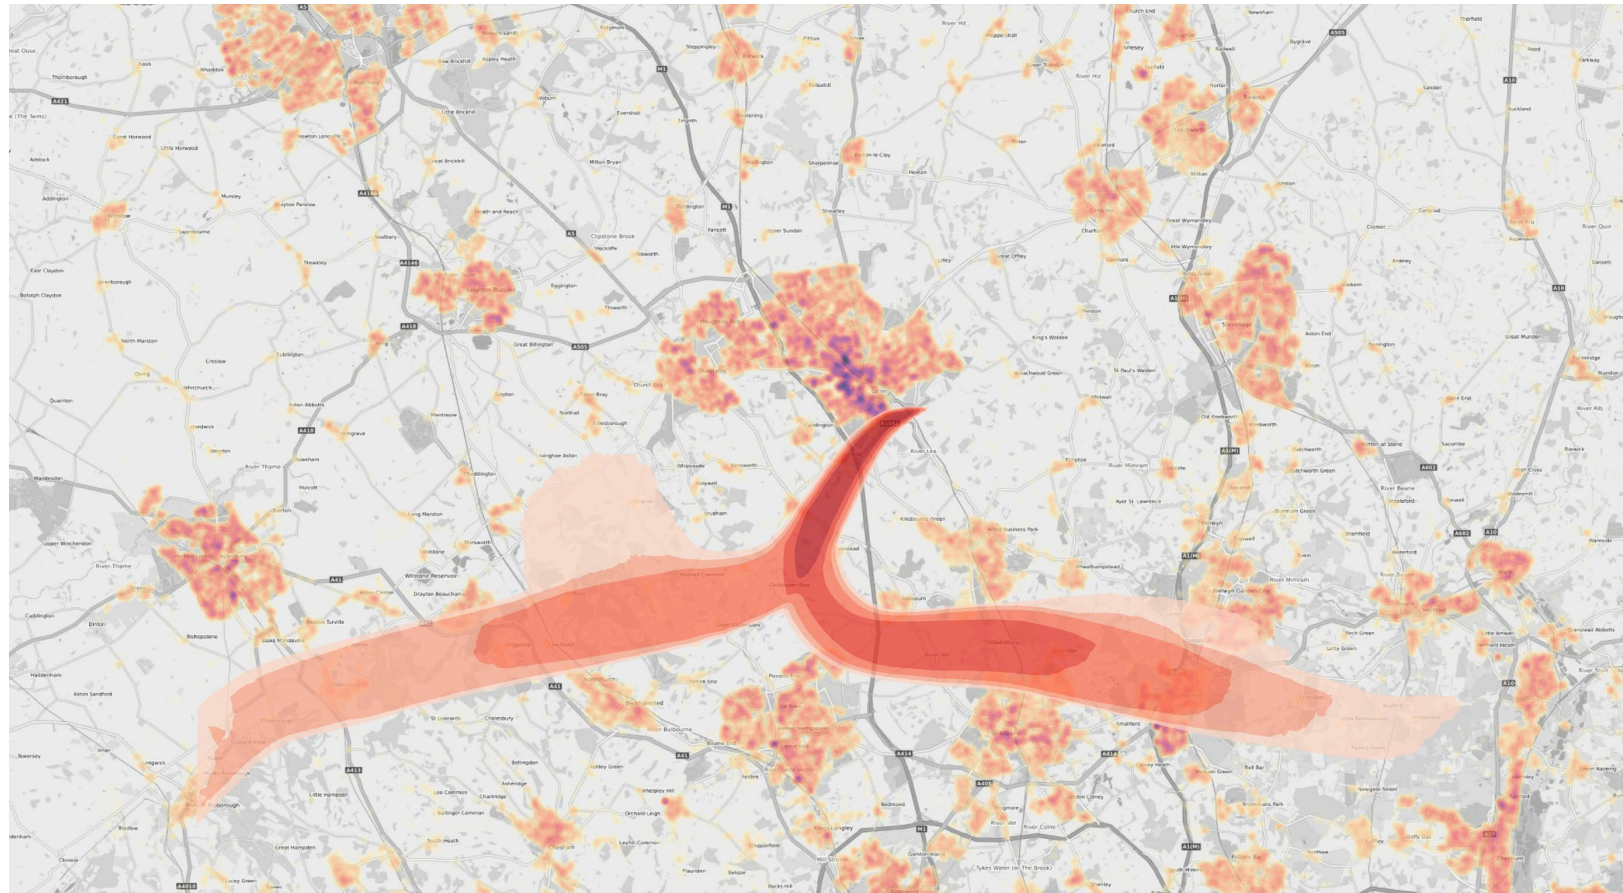

The data shown within the estimated track mileage tables is based on indicative centrelines; more detailed assessment will be undertaken at Stage 3 of the process.

More information about the methodology is detailed in the Stage 2B Initial Options Appraisal document.

Initial Options Appraisal

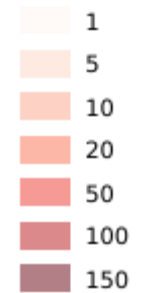

Westerly Departures

Westerly Departures – Option 1 Baseline (including vectors)

Average movements per day.

Assumes 70% of Luton's departures averaged across 365 days

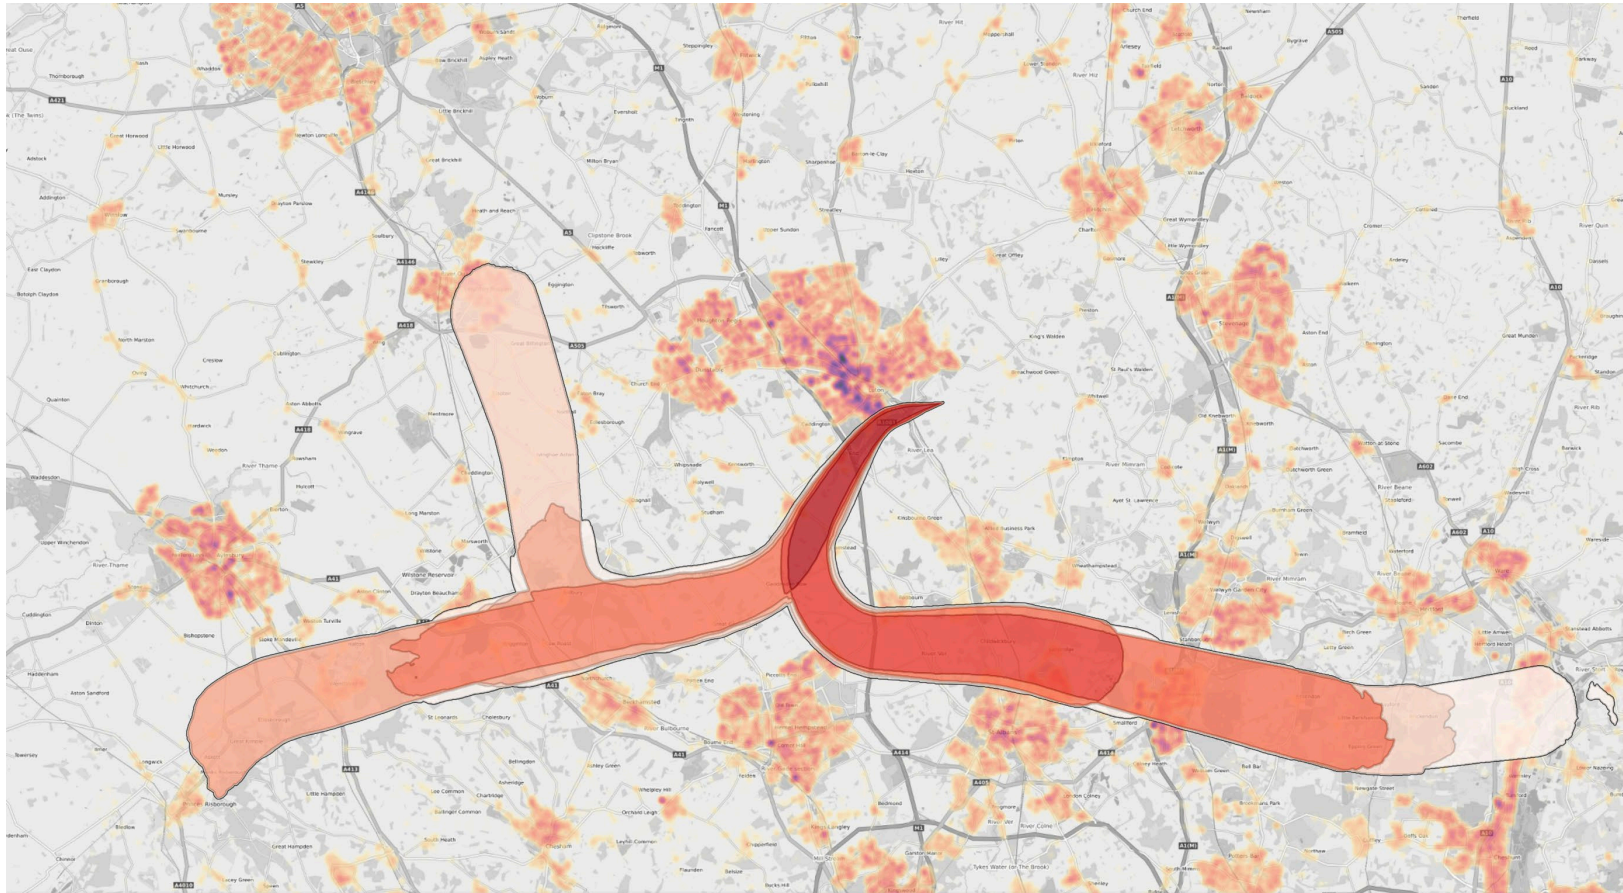

Dense areas of population (yellow to purple)

Baseline (Vectoring) overflight contour 0 - 7000ft (day)

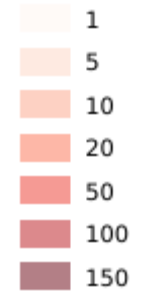

Baseline Westerly Dep Option 1 (Vector)*	Population over flown 0-7000ft (1 times per day)	Population over flown 0-7000ft (10 times per day)	Population over flown 0-7000ft (50 times per day)	Population over flown 0-7000ft (100 times per day)	No. Schools 0-7000ft	No. Hospitals 0-7000ft	No. Worship. 0-7000ft	No. Historic Parks/Gdns 0-7000ft	Area (Km2) of AONB overflown. 0-7000ft	No SSSI. 0-7000ft	No Nat200 0-7000ft
