

## EXETER AIRPORT (FASI)

### Develop & Assess Gateway Outcome - 25<sup>th</sup> March 2022

[STATEMENT]

As part of 'Stage 2 – Develop & Assess' of the CAP 1616 airspace change process, the UK Civil Aviation Authority has completed a Develop & Assess Gateway Assessment of Exeter Airport's airspace change proposal (ACP) – Exeter Airport FASI (ACP-2018-47).

In order for the CAA to allow an ACP to pass through the Develop & Assess Gateway:

1. the change sponsor must have produced a comprehensive list of airspace change design options;
2. the change sponsor must have engaged with relevant stakeholders to explore those options to the CAA's satisfaction against the requirements in Appendix C;
3. the change sponsor must have produced a design principle evaluation that the CAA has accepted, showing how its design options have responded to the design principles;
4. the change sponsor must have produced an Initial options appraisal (phase I);
5. the CAA must have produced and then published an assessment that the options appraisal is satisfactory against the requirements in Appendix E.

At the Gateway assessment for this proposal, the CAA concluded that Criteria 1, 2, 3 and 5 were not met for the reasons set out below:

#### 1. **Development of the Design Options:**

- The submission does not provide sufficient evidence that all viable options have been identified.
- The submission does not provide sufficient evidence as to why design options have been either progressed or discounted.
- The submission does not evaluate the design options correctly against the required technical criteria.

#### 2. **Design Principle Evaluation:**

- The submission does not assess the proposed design options in a fair and consistent manner.

#### 3. **Initial Options Appraisal:**

- There were some omissions within the Initial Options Appraisal.

The Civil Aviation Authority has informed the change sponsor of this decision. In line with CAP1616, the change sponsor is now able to reconsider its submission before resubmitting it for further review by the Civil Aviation Authority at a future Develop & Assess Gateway.

It is important to note that whether an ACP passes a gateway successfully or not does not predetermine the CAA's later final decision on whether to approve the airspace change proposal. This decision is not an explicit or implicit comment on the merits or otherwise of this ACP. This will come at the decision-making stage (Stage 5).
