Reference

A. [CAA Decision to consider greater than 90 day period](#)

Dear [REDACTED],

In response to reference A, the communication between CAA and Head DAATM on 1st April 2022, as sponsor of ACP-2021-048 this letter is to confirm the MoD's continued commitment to the pursuance of a permanent airspace solution.

As an agent of the MoD, I can assure you as the regulator that this department will continue to allocate sufficient, dedicated resource to the task of progressing ACP-2020-026. The terms of reference for the post holder of SO2 Training Enablers (Airspace) have been revised to reflect the importance of this task. This role's primary output is the progression of ACPs and liaison with other MoD ACP sponsors to provide a modern training infrastructure for the Royal Air Force.

In co-operation with stakeholders and other MoD departments, primarily Defence Airspace and Air Traffic Management (DAATM), we aim to complete ACP-2020-026 in a timely manner to be able to withdraw temporary airspace structures as quickly as possible.

Yours sincerely
