Subject: Skyfarer BVLOS Demonstrations, Coventry (ACP-2021-057) - Extension Request
Date: 23 January 2023 13:43:00

Title: Skyfarer BVLOS Demonstrations, Coventry

Reference: ACP-2021-057

Date: 23 January 2023

I am writing to you today in relation to the Airspace Change Proposal (ACP) titled "Skyfarer BVLOS Demonstrations, Coventry (ACP-2021-057)". Following the request to extend the period of this TDA, you have conducted targeted stakeholder engagement and you have provided evidence of your engagement in a summary report. My colleagues and I have reviewed your engagement report, determining that the level of targeted engagement undertaken is proportionate for this request and the post engagement report meets the requirements set out in the process. With that in mind, I can confirm that the decision has, noting the conditions and restrictions outlined below, been to **approve** the request for extension to the Temporary Danger Area complex in relation to ACP-2021-057.

Your proposal to extend was considered against the original requirements in your Statement of Need. We noted no significant increase in impact by extending the dates and that key local stakeholders appear content with the proposal and deconfliction measures detailed in the Letters of Agreement. In addition to this, there have been no adverse feedback or complaints received during the previous implementation period. The requested extension duration and number of flights appears proportionate to your stated requirements.

For this reason, you are approved to activate the TDA structure for the purpose of UAS BVLoS demonstrations from 9 March to 5 April 2023 (inclusive) in accordance with your proposed AIC. You are approved a maximum of 8 activations during the 28-day extension period. If satisfied that you have met the criteria for project success before the end of the TDA applicability period, you are to withdraw the AIC for the TDA immediately.

The following conditions should be met prior to activation of the TDA:

- The full range of stakeholder groups must be informed of the CAA's regulatory decision and be provided with clarification of when the decision will be implemented;
- The stated dates and duration set out in the Letters of Agreement should be updated;
- Appropriate measures must be put in place for the monitoring, collating and reporting on the level and contents of complaints to the CAA and stakeholders should be notified of the arrangements. The CAA expect reporting on complaints on a two-weekly basis throughout the operation of the TDA;
- You must record all approvals and denials to enter the TDA whilst it is active.

The next stage for this ACP is 'Implementation'. The CAA will submit a revised Aeronautical Information Circular (AIC) which will be published on Thursday 9th March 2023. You will be unable to activate the required TDA until at least 9th March 2023, when your 28-day notification period will commence.

In order to activate the required Temporary Danger Areas, please contact Airspace Regulation (Operations) quoting an activity number and TDA reference, both will be provided to you in due

course, with the required activation timings.

Kind regards,

[REDACTED]
