[REDACTED]

WRT the March activations my language is not quite as strong or supportive as you might hope. I'm not supportive but am accepting (subtle but important difference) of the activations in March; especially in light of absolute no noise from 78 Sqn and the Pennine radar task still be largely ignored/not fulfilled thus having a negative effects of the environment through increased fuel burn and commercial effect on my airline customers.

Yours,

[REDACTED]

Can I please ask if you're content to support the intended March 2023 activation dates for TDA597, with a view to further discussions (with 78Sqn) regarding the requested Summer 2023 activation requests?

Happy to chat if needed/or speak with 78Sqn if comms on this front have gone quiet.

Look forward to hearing from you.

Thanks in advance
