ACP-2021-048 STAKEHOLDER ENGAGEMENT

Feedback request for March 2023 activations of TDA EGD597

Dear UK Airspace user,

I hope that you are aware of the MoD's ongoing Airspace Change Proposal for Future Combat Airspace. As a reminder, the MoD seeks to establish a suitable volume of airspace to enable the safe delivery of large-scale military collective training exercises to ensure that UK combat forces are suitably prepared to defend UK interests in line with the UK Defence Strategy.

Please consider the following questions and feel free to add any comments not covered specifically by the questions posed.

- **Safety** - did the airspace itself cause any safety issues or raise any safety concerns?
- **Operational Impacts** - What effect did the activation of the airspace have on your operation?
- **Airspace Management** - how well did the notification, activation, and management of the airspace work?
- **Air Traffic Management** - did the handling of military Ex traffic and/or civil traffic in and around TDA EG597 cause any issues?
- **Environment and Noise** - did the activation of TDA EG597 cause any environmental or noise concerns?
- **Any other observations** about TDA EG597?

Your responses are kindly requested by 6 April 2023. We request that responses are sent in writing to the email address associated with this correspondence.

Yours faithfully
