

AIRSPACE MODERNISATION

AIRSPACE CHANGE PROPOSAL

STEP 2B APPENDIX D - OPTIONS SHORTLISTING
WORKSHOP

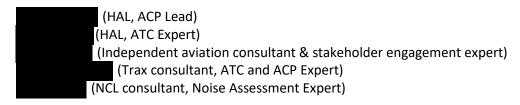

Heathrow

Stage 2 Re-submission: Workshop on Shortlisting of Options

Wednesday 22 May 2024

Attendees:

1.1		Thanked everyone for attending and introduced the purpose of	
		the session: to meet steps 2, 3 and 4 as set out in the CAA's letter	
1.2		Clarified that all decisions taken today would be:	
1		Reviewed by our legal advisor for consistency against	
		policy and guidance, and	
		2. Ratified by Heathrow's Airspace and ATM Governance	
		Group	
	Step 2: Take into account any views on the proposed shortlisting methodology received		
	from those stakeholde		
2.1		Took the group through the summary of feedback received from	
		stakeholders in relation to our shortlisting methodology.	
2.2		Interesting that feedback on moving Tests 4 and 5 to Stage 3 was	
		mixed. It's good to have support for the proposal, but we need to	
		understand the objections more carefully.	
2.3		Objections generally related to a feeling that Heathrow was	
		placing less importance on AONBs or on Richmond Park by not	
		using these as factors for discontinuation at Stage 2.	
2.4		We know this is not the case and that we have made strong	
		commitments regarding minimising the impacts to these specific	
		areas at Stage 3. We want to make decisions based on more	
		robust data, and when we have system options so that we better	
		understand how these areas might be overflown by the complete	
		system.	
2.5		Some of the stakeholders made statements regarding the	
		importance of AONBs or of Richmond Park. They also asked that	
		we consider potential new legislation for AONBs and potential	
		expansions to these areas.	
2.6		Ok. At Stage 3 we will have a much stronger evidence base on	
		which to assess these areas for tranquillity and amenity impacts.	
		And we will of course continue to review and monitor for	
		changes in legislation.	
2.7		Quite a few stakeholders queried the definition of 'local	
		circumstances' and asked whether we could consider treating	
		their local park in the same way we are treating Richmond Park.	
2.8		It's right that we commit to looking at these suggestions. We	
		have compiled a list based on stakeholder feedback and a review	
		of these locations can be undertaken at Stage 3.	
2.9		I agree. We have databases with information on all the parks in	
	_	the south-east of England so we can support this exercise.	
	•	• • • • • • • • • • • • • • • • • • • •	

2.10		Are we all content that Stage 3 is the right time to do this? Or should we be incorporating this into our methodology now?
2.11		It makes sense for us to consider these specific areas at Stage 3
2.11	=	when we are compiling system options and considering
		tranquillity impacts, since all of these suggested locations are
		parks or gardens. The time of day that the flight path would be in
		operation is also relevant and we will know more about that at
		Stage 3 when we are looking at options for how respite will be overlaid onto the options.
2.12		These potential local circumstances were not suggested to us
		before now so we won't have DPE or IOA data for them. Stage 3
		is going to require a more accurate geographical assessment of
		the options so it makes sense for us to consider these at that
		stage.
2.13		We also had some feedback that we should not be prioritising
		Richmond Park over the people who live nearby and don't want
		aircraft disturbing their sleep.
2.14		That is interesting and further supports the need for further
		investigation of impacts to both the park and the surrounding
		area at Stage 3.
2.15		Tests 1 – 3 have no regard for who is overflown: they treat
	_	everyone equally. This is appropriate at this early stage of route
		assessment where the routes have been prepared having regard
		to the design principles. Specific local circumstances can be
		better considered at Stage 3 once we have route options within a
		system.
2.16	All agreed that none o	f the feedback indicates that we should reinstate consideration of
	Tests 4 and 5 at Stage	
3.1		Took the group through the wider feedback on our proposed
		shortlisting approach.
3.2		A few stakeholders queried our definition of "significant" when
	· —-	shoutlisting outline. These comments were also limbed to
1		shortlisting options. These comments were also linked to
		feedback that stakeholders would like greater transparency in
3.3		feedback that stakeholders would like greater transparency in
3.3		feedback that stakeholders would like greater transparency in how we undertook the shortlisting.
3.3		feedback that stakeholders would like greater transparency in how we undertook the shortlisting. That's understandable. I think we should review and update the
3.3		feedback that stakeholders would like greater transparency in how we undertook the shortlisting. That's understandable. I think we should review and update the Stage 2 documents with this mind, so that stakeholders (and the
3.3	All agreed that the sho	feedback that stakeholders would like greater transparency in how we undertook the shortlisting. That's understandable. We do need to be clear that in declaring something "significant" these tests are being applied in the context of the specific set of options for arrivals/departures to/from a specific runway end. Significance is assessed based on a percentage change and is a relative assessment for this stage of the ACP only. It will never be possible to identify one threshold for "significant"

3.7		Yes agree. It would make sense for us to use percentage changes		
		in presenting the shortlisting so it is clear that we are comparing		
		each option to the relevant baseline in a relative comparison,		
		rather than comparing absolute numbers.		
3.8		Agree. I think this will be easier for stakeholders to understand as		
		well – if we say that X thousand fewer people are experiencing		
		noise events based on an option then it holds less context than if		
2.0	All III III	we say 20% fewer people experience noise.		
3.9	All agreed that the shortlisting process would be based on percentage changes to the			
	baseline and each set of options would be assessed as an independent runway set., Also agreed that the results would be shown in tables by runway set.			
4.1	agreed that the results	Took the group through the feedback on our approach to		
4.1		engagement and through other feedback/queries.		
4.2		I think the proposed Heathrow responses in here cover all of the		
7.2		points we can make.		
4.3		Is there anything else in here that anyone thinks we should take		
4.5		account of when deciding what our shortlisting approach will be?		
	Step 3: Make a fresh d	lecision on a shortlisting methodology		
5.1		Reminded the group of the proposed shortlisting methodology.		
		Does anything in here indicate that the proposed approach we		
		shared in the engagement material is not appropriate?		
5.2	All agreed that the proposed shortlisting approach was considered appropriate.			
	Step 4: Apply the chosen shortlisting methodology to our flight path options			
	objectively, consistently and transparently			
6.1		Shared a spreadsheet with all of the relevant IOA data, shown by		
		runway set.		
		Suggest we start with departures and work through each runway		
		end, applying each of the Tests 1-4 in turn.		
6.2	SIDS 27L: All agreed th	at 3 options should be discontinued (B, C, D)		
6.3	SIDS 27R: All agreed th	at 3 options should be discontinued (B, C, D)		
6.4	SIDS 09L: All agreed that no options should be discontinued due to there being no			
	baseline data to compare against (runway 09L isn't routinely used for departures today).			
	These options should all be further assessed at Stage 3 when we can better understand			
	their relative impacts compared with each other (and once they are considered in a			
	system).			
6.5	SIDS 09R: All agreed that 4 options should be discontinued (A, D, E, H)			
6.6	All reviewed the runway sets and agreed that 10 departure options should be			
	discontinued at this stage. The remaining 26 departure options should be shortlisted for			
	consideration and assessment at Stage 3.			
6.7	PBN Arrivals 27L: All agreed that 3 options should be discontinued (I, J, K)			
6.8	PBN Arrivals 27R: All agreed that 1 option should be discontinued (L)			
6.9	PBN Arrivals 09L: All agreed that 11 options should be discontinued (D-L, S, U)			
6.10	PBN Arrivals 09R: All agreed that 3 options should be discontinued (I, K, R)			
6.11	All reviewed the runway sets and agreed that 18 arrival options should be discontinued			
	at this stage. The remaining 71 arrival options should be shortlisted for consideration and			
	assessment at Stage 3.			
6.12		Agreed to present the shortlisting decisions for legal review and		
	<u> </u>	for approval by the relevant Heathrow governance group.
