CAA Decision Date	4 April 2025
Target AIRAC & AIS sponsor submission cut-off	11 April 2025

This checklist has been developed to ensure that change sponsors address relevant regulatory requirements when compiling their submissions to the CAA. Completion of this form does not in itself guarantee CAA approval. The CAA will review and assess the actual content of the change sponsor's submission, before making a regulatory decision on whether the relevant regulatory requirements have been addressed satisfactorily.

Change sponsors should refer to the contents of CAP 1616 and CAP 1616f for further guidance on the requirements listed below.

Stage 4 enables the change sponsor to make any final adjustments to the airspace design ahead of submitting the final airspace change proposal to the CAA. This stage commences when the Stage 3 consultation has closed and the responses have been collated, reviewed and categorised by the change sponsor in the consultation response document.

Change sponsors should select a final design option and consider any updates to it in light of information received in the consultation, complete the final options appraisal, assess the need for additional consultation, and submit their final airspace change proposal describing the airspace change to the CAA and stakeholders.

The change sponsor or the CAA may request a meeting to discuss the final airspace change proposal submission so that any gaps can be identified, and preliminary queries addressed.

Stage 4 is completed with the submission of the full and unredacted version of the final airspace change proposal to the CAA, including any supplementary documents, annexes, or appendices, along with publication (redacted where appropriate) on the airspace change portal.
